Carers Needs Assessments

What is a Carers Needs Assessment?

This process provides an opportunity to discuss the support or services you might need to help you in your caring role. It looks at how caring affects your life physically, emotionally and practically, and at whether you are able or willing to continue caring.

Our Carer Advisor will discuss with you any support you may receive already and consider with you how other approaches or activities might help you. They will also be able to advise, for example, about benefits you may be entitled to and will support you in accessing specialised help where appropriate.

A carer's needs assessment is **not** about assessing how well you are carrying out your caring role, it is only about supporting you as a carer.

Who can have an assessment?

People aged 18 and over who provide unpaid care for an adult relative or friend in Sheffield can request an assessment from the Centre.

How are assessments carried out?

Sheffield Carers Centre is responsible for carrying out carers needs assessments on behalf of Sheffield City Council. You will therefore speak to one of the Carer Advisors at the Carers Centre when you go through the process of being assessed.

Because the Carers Centre team is carrying out assessments on behalf of the Council, in some circumstances, details of your assessment may be forwarded to the Council and recorded on their database. This will mainly be the case if the person you care for is receiving support from the Adult Social Care (within the Council). We will discuss this with you when you start the process.
