

Sheffield Carers Centre: Inclusivity Statement

At Sheffield Carers Centre we are committed to diversity and equality of opportunity. We aim to reflect this in everything we do: our vision, mission and values, our work with carers and other organisations.

Sheffield Carers Centre is committed to reaching out to, engaging with and involving carers from all sections of the population in all aspects of its work. This includes the provision of services and support, volunteering, carer engagement, staff recruitment and governance.

Our person-centred approach recognises that every carer is different. No carer who uses our service will experience discrimination because of their gender, religion, ethnic or national origin, age, marital status, sexual orientation, political affiliation, economic status, disability or caring situation.
