

Call for Participants in Palliative Care Research

I am Dr Mark Walker and work as a General Practitioner in Sheffield and as a specialty doctor in Palliative Medicine in Chesterfield.

I am conducting a research project and would like to speak with people who have a life limiting illness, and possibly one of their family members or carers, who have received care from a General Practitioner in the out of hours setting which includes evening, overnight or at a weekend. This is the care service accessed through 111.

The research project aims to understand the experiences of people with known palliative and supportive care needs. The results will be used to improve the delivery of care in the out of hours setting.

If you would like to be involved in this study and think that you are eligible to participate please contact me directly at walkerma@cardiff.ac.uk or 079189 78316 and more information will be provided.

If you prefer, a family member or carer can make the initial contact on your behalf.

The research project is sponsored by Cardiff University and has received ethics approval.

Thank You.

Dr Mark Walker
